
Health Screenings

- The creation of one streamlined Adult benefit package under HealthChoices Expansion eliminates the need for the health screening tool and medical frailty validation, making a simpler and less complicated process for recipients and providers.
- Medical frailty criteria that is used to help determine an individual's benefit package under the *Healthy PA* program is discontinued under HealthChoices Expansion.

- **Health Screening** – will no longer be part of the application process or renewal process for Medicaid benefits in Pennsylvania. Also, if a provider is a community partner:
 - The screening is being removed from COMPASS effective 4/27/2015.
 - The screening is being removed from the paper application.
- **Clinical Validation** – is part of the health screening results evaluation but will no longer be performed.
- **Claims Determination Process** – will no longer be incorporated to help determine the benefit package.
- **Passive Mapping Process** – includes an initial evaluation of individual case data, claims data and the results of the health screening to help determine the benefit package but will no longer be utilized.
