

Alternative Payment Arrangements Update

The last communication that came out in July provided a schedule of Gap payments through 12/31/2021. Magellan will be extending these Gap payments through March 2022. As a reminder, Gap payments are calculated by total revenue at the Tax Identification (TIN) level for service month compared to your current APA amount which was based on your 2019 reimbursement average plus 4%. If revenue for a service month is less than that, a Gap payment will be made for the difference. If your FFS claims are above that average, you will not receive a bridge payment. Please continue to monitor your fee for service claims and work any denials as quick as possible.

Service Month – **January 2022**
